## Description

Stackable chair for indoor as well as outdoor use. Galvanized metal wire covered with a polyester powder coat, available in ten colours.

Lead time 6 weeks.

## Instructions

For metal surfaces: Rinse with large quantities of water. Clean with wetting agent solution and use a sponge or soft cloth. Post-rinsing and drying. Specific instructions based on type of soiling: Greasy film can be removed with a concentrated wetting agent solution, alcohol or surfactant, after allowing the solution some time to break down the film before removing. Unidentifiable, stubborn dirt can be treated with facade cleaner (e.g., Ambruch2 [www.ambruch.de](http://www.ambruch.de)) or Power Wipes [www.interflon.net](http://www.interflon.net). Note: The specific methods listed here should be tested accordingly for possible damage to the surface.
