

## MARBLE DISC TABLE

---

The Mater Marble Disc Table is a new side table crafted in Indian marble, created as an extension of the Disc Table in FSC certified oak wood. This versatile side table is characterised by a minimal aesthetic and stringent style created with a table top in rich Indian marble and steel legs.

Millings underneath the table top adds a light expression to the heavy material. The marble table top is handcrafted using a traditional lathe, thereby machining a sophisticated curved under structure – an ancient local technique used in small workshops across Rajasthan, India.

The balance between the minimalistic steel legs and the heavy table top in marble, creates a classic and durable design.

The table is available in two marble variations; jungle green and jungle brown marble, that originates from India and is a very prominent stone found in the state of Rajasthan, India. This marble is derived from the serpentinite stone that lies between traditional white marble and granite in terms of hardness and durability.
