

narcissist mirror

The narcissist mirror can be mounted to any wall surface. The frame is constructed from solid lumber that houses a bronzed mirror. The narcissist has dual purposes, with the mirror acting as the primary function, while the lumber frame works as a shelf. With the mirror surface extending only a portion of the full length of the frame, the narcissist plays between positive and negative space, by revealing a section of existing wall surface. The narcissist mirror can also be mounted in multiples to create a dynamic wallscape.

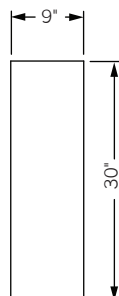

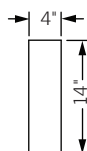

Specifications Solid wood frame available in walnut, white oak, or ebonized oak. Bronze surface mirror.
