Piet Boon® is a world renowned Dutch multidisciplinary design studio and a global luxury lifestyle brand, with both private and corporate clients around the world.

The company was established in 1983, when Piet Boon began his career as a building contractor. Karin Meyn joined the company in 1986 as joint business partner and Creative Director. Together they lead a dynamic and experienced team of international architects, designers, stylists and artisans responsible for a versatile range of exterior and interior projects.

The partnership with Maretti Project Lighting reflects a mutual commitment to excellence, a love of beautiful materials, and exceptional attention to detail. Maretti combines carefully considered Piet Boon® designs with function, delivering a range of timeless and exclusive lighting.

Interior architecture and design is not only about what you see, it's about embracing the senses. And an interior only truly comes to life with a thoughtful and bespoke lighting plan.
