

Brazil, India, Italy & Finland side table

Michael Marriott

A set of marble topped side tables with a checker plate steel base and a central table stem. Marriott has used four different types of marble, with each table named after the country in which it originates. Carrara from Italy, Baltic from Finland, Verde Rajasthan from India and Ubatuba from Brazil.

Italy has a pink powder-coated finish on the base, while the others versions are in galvanised steel.

The marble tops have a slight chamfer on their top and bottom edges.
