

# FLOWERPOT VP3

BY VERNER PANTON  
1969

The Flowerpot lamps became synonymous with the Flower Power movement from the late 60s. Reflecting a break from convention to embrace a more open, modern mentality that promoted peace and harmony. Such was the mindset of the designer, Verner Pantan. One of the most forward-thinking talents of his time. The lamp's simple design consisting of two semi-circle spheres facing each other is not only an icon of that era, the Flowerpot lamps remain equally as appealing to new generations. Especially in the new series of colours launched by &tradition.

Captivated by fluid forms and a vast spectrum of vivid colours, Pantan designed this lamp to be more than a source of illumination. He went on to create entire interiors filled with furniture, saturated with psychedelic colours and accentuated with lamps appearing in repeated patterns as decorative details. From futuristic furniture fairs to exhibition spaces to museums of contemporary design, galleries and private collections, the Flowerpots continue to signify a singular form ula for beauty and simplicity.
