The Pavilion lounge chair appears almost like a rope that's come undone. The gentle curves of the wood veneer back and seat create a lyrical rhythm that continues with the steel tube arms and legs. The result is an elegant silhouette from any angle.

What makes the Pavilion lounge chair unique is that it's slightly angled back, with a wider seat for lounging in comfort and the option of an upholstered seat.

The name draws its inspiration from the modernist architecture of the Langelinie Pavilion overlooking the Copenhagen waterfront, which subsequently led Anderssen & Voll to bring their own fresh take on modernism with the Pavilion series.

Given its open, airy aesthetic and the advantage of being a stackable chair, the Pavilion lounge chair is particularly appealing to the contract market, as well as the private sector. You can easily envision any number of lounge chairs filling a space – in a lyrical design that won't make the space look full.
