

siren collection

jacob nitz

The Siren chair is a refreshing and colorful design by Jacob Nitz. Assembled in a method with no exposed fasteners, the seating seems to be embraced and presented by its frame.

Siren is an occasional stacking chair with a steel frame, bent wood seating - either upholstered or exposed veneer - all offered in a wide range of finishes. The chair is developed for high-end project use and has optional a 4-leg or sled base frame which is finished with a durable powder coating.
