HAUTE LIVING

Frame Armchair

The Frame Armchair began from a simple element: "the joint", which, combined with elegant rounded 45 degrees extrusions, creates an almost infinite family. The design is characterized by organic junctions that – in their possible combinations – create minimal, compact and powerful structures. Designed by Stefano Giovannoni.

Aluminum base with satin, polished, or burnished brass finish. Backrest in rubber in different densities with plywood panel. Side and back in natural Cuoio leather. Cushion covers are completely removable for both fabric and leather versions.

Measurements: 78 cm H x 90 cm W x 90 cm D
30.75" H x 35.5" W x 35.5” D
