Information

Designer: Chris Martin

Year: 2020

Description

Roadie is a lightweight and stackable sofa for outdoor environments. Constructed in aluminium and reinforced by functional stays, increased stability is provided. The aluminium has been heat treated to achieve maximum strength. The high back has a comfortable angle and the designed cushion for the bench provides extra comfort.

Instructions

For cleaning advantageously use a detergent, or mild pH neutral detergent and lukewarm water in a well wrung cloth. Then wipe off with clean water and wipe dry. To preserve the look and finish you should be aware not to use: – Alkaline or aggressive cleaners, – Solvent – Preparations containing abrasives, – Abrasive tools. Remember not to let the cleaners or other liquids on the surface for long. For furniture and surfaces for use in public spaces, it is also important to remember not to use disinfectants that contain a high concentration of alcohol or alkaline substances, such as 70% alcohol. There are disinfectants that can be advantageously used, but that does not affect the painted / varnished surface appreciably. Note that freshly painted surfaces are susceptible to scratching. Surface final resistance is only achieved after about a month. Tape and other foreign substances such as, for example, adhesive and moisturizers can soften the treated surface and cause peeling / paint drop.
