Bloom Floor Lamp

Designer- Tim Rundle / Year 2019

The Bloom Pendants' superelliptical form is inspired by the gentle dynamic flow of paper lanterns. Its glorious lit effect is the result of transparency and light. Two contrasting materials – a finely perforated mesh core and frosted blown glass, combine to project a soft focus texture onto the inside of the shade. At the same time, an unobstructed pool of light is projected downwards onto objects below. Blooms distinct character is evident both in its on and off state, creating a versatile, value for money Pendant lamp.
