MATERIALS

FRAME

COATED ALUMINUM

Aluminium is a non-ferrous metal, which combines great mechanical rigidity with light weight; this makes it especially suitable for making furniture. If treated correctly it has a good resistance to corrosion. One of the treatments is powder coating. After a chemical pre-treatment an epoxy powder is applied statically and baked.

SEAT

BATYLINE®

A woven polyester fibre protected by a PVC coating. This coating guarantees exceptional resistance to climatic conditions and UV exposure. The fact that there is no moisture absorption results in quick-dr ying action, little sensitivity to staining, and simplicity in cleaning.
