Depth	245 cm / 96 inch
Height seat	39 cm / 15 inch
Height armrests	62 cm / 24,5 inch
Height cushions	79 cm / 31 inch

PACKAGING

This item is carefully packed per piece.

MAINTENANCE

<http://www.royalbotania.com/maintenance>

MATERIALS

FRAME

COATED ALUMINUM

Aluminium is a non-ferrous metal, which combines great mechanical rigidity with light weight; this makes it especially suitable for making furniture. If treated correctly it has a good resistance to corrosion. One of the treatments is powder coating. After a chemical pre-treatment an epoxy powder is applied statically and baked.

COATED ALUMINUM - WHITE

COATED ALUMINUM - SAND

COATED ALUMINUM - BLACK

SEAT

BATYLINE®

A woven polyester fibre protected by a PVC coating. This coating guarantees exceptional resistance to climatic conditions and UV exposure. The fact that there is no moisture absorption results in quick-drying action, little sensitivity to staining, and simplicity in cleaning.

TOP

GLASS

Its resistance to staining and scratching makes glass a highly suitable material when making tabletops for outdoor furniture.

WHITE

PEARL GREY

BLACK

CERAMIC

Ceramic table tops are made of inorganic materials that crystallise at very high temperatures and are thus very hard and resistant to wear.

WHITE

PEARL GREY

BLACK

TEAK

We only use carefully selected, fully grown teak, which is harvested in accordance with the strictest environmental standards. The reason for its generally commended durability is the high levels of natural oils it contains. The resulting minimal moisture absorption prevents warping which gives it great stability. Moreover, the wood is extremely resistant to the influences of chemicals, as well as against attacks by vermin.

TOP

GLASS

Its resistance to staining and scratching makes glass a highly suitable material when making tabletops for outdoor furniture.

CERAMIC

Ceramic table tops are made of inorganic materials that crystallise at very high temperatures and are thus very hard and resistant to wear.

TEAK

We only use carefully selected, fully grown teak, which is harvested in accordance with the strictest environmental standards. The reason for its generally commended durability is the high levels of natural oils it contains. The resulting minimal moisture absorption prevents warping which gives it great stability. Moreover, the wood is extremely resistant to the influences of chemicals, as well as against attacks by vermin.
