(optional)

##### COATED ALUMINUM

Aluminium is a non-ferrous metal, which combines great mechanical rigidity with light weight; this makes it especially suitable for making furniture.

If treated correctly it has a good resistance to corrosion. One of the treatments is powder coating. After a chemical pre-treatment an epoxy powder is applied statically and baked.

#### TOP

##### GLASS

Its resistance to staining and scratching makes glass a highly suitable material when making tabletops for outdoor furniture.
