Stuff cabinet

Studio Parade - 2013

Dimensions:

Upholstered:

Unit 120/60 x 35 x 42 WxDxH

Open frame:

120/60 x 35 x 21/42 cm WxDxH

Base: 12 cm H

Material:

The shelves and top of Stuff are always covered with a white laminate, the base and open frames are made of solid steel and powdercoated white. With a wide range of colours and textile structures for the upholstered units, a unique and personal cabinet can be composed.

Stuff is a unique cabinet system, originally designed for the Dutch Design Academy (NL) by Studio Parade. Stuff consists of stackable light weight modules, upholstered with fabric. They can be combined with open frames and together with a loose base and top a personal cabinet can be created! Without using any tools, in a quick and simple way, it can be changed at any time by simply switching the modules to another position. Stuff can be used as a wall system, but also as room divider. Because of the use of fabric, Stuff also has an acoustic function. The perfect system for both domestic as well as contract use!
